

EAGLE EYE VIDEO

Take your video surveillance to the next level with Eagle Eye Video

Maximize your system's potential and reduce your total cost of ownership with remote video services from Central Alarm. Compatible with any new or existing installation, Eagle Eye Video services are an instant upgrade to an "always available" video surveillance platform and advanced suite of services.

Have a DVR? No problem! Eagle Eye Video services compliment existing DVRs and provide complete redundancy.

Instant Benefits:

- Continuous off-site video recording ensuring no video loss
- 24/7 real-time live look-in via web browser and mobile phone
- Instant video event notification
- Anywhere / anytime access to the simple dashboard to view video timeline, events, and stored video

Featured Services:

Instant Event Notification

Receive notifications of alarm events, open/close reports, scheduled video guard tours, or simply when your system is armed or disarmed.

Mobile Access and Live Look-In

Watch live real-time video from your computer or smartphone. Scheduled guard tours ensure you always have visibility and can respond immediately.

Services Dashboard

Accessible anywhere / anytime, via a standard internet browser. Easily search and playback videos by date, time, schedule, or events. View live look-in, record, or retrieve stored video remotely.

Off-site Video Storage

Secure, continuous off-site video recording that can be stored for up to six months. Full redundancy provides 99.999% uptime reliability, superior to any standard DVR.
